

Rishabh Srivastava

Computer Science and Engineering (CSE) — 3rd Year — AKTU
rishabhsrivastava796@gmail.com — +91-9560705690 — [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate with strong problem-solving skills and hands-on experience in building scalable full stack web applications and AI-driven systems. Proficient in Data Structures and Algorithms, REST API development, and cloud deployment. Seeking a Software Development Engineer role to build high-performance backend systems and user-centric applications.

TECHNICAL SKILLS

Programming: C++, JavaScript, Python

DSA: Arrays, Strings, Linked Lists, Stacks, Queues, Trees, Graphs, Recursion, Dynamic Programming

Web: HTML5, CSS3, React.js, Node.js, Express.js, MongoDB, REST APIs, JWT, MVC Architecture, Deployment (Render)

AI/ML: Supervised Learning, Feature Engineering, Model Training, Decision Tree, Random Forest

IoT & Cloud: ESP8266, Soil Moisture Sensors, Blynk Cloud, Weather API

Tools: Git, VS Code, Postman, Overleaf

PROJECTS

AI Powered E-Commerce Website (OneCart)

[Live](#) — [GitHub](#)

React.js, Node.js, Express.js, MongoDB, JWT, REST API

- Developed a full stack e-commerce platform with AI-based product recommendation system.
- Implemented authentication, product management, shopping cart, and order processing.
- Applied machine learning techniques to analyze user behavior and personalize recommendations.

AI Powered Learning Management System (LMS)

[Live](#) — [GitHub](#)

React.js, Node.js, Express.js, MongoDB, Role-Based Access, REST API

- Engineered an AI-enabled LMS with personalized course recommendations and learning analytics.
- Implemented role-based access control and performance-driven learning paths.

AI-Driven Smart Irrigation System

[GitHub](#)

Python, Flask, Machine Learning, ESP8266, IoT, OpenWeather API

- Designed and implemented an intelligent irrigation system using IoT, Machine Learning, and real-time weather data.
- Integrated ESP8266 with soil moisture sensors and applied ML models for automated pump control.
- Built a Flask-based cloud ML server for real-time irrigation prediction.
- Implemented manual override with AI cooldown logic to prioritize user control.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering

AKTU Affiliated College

2023 – Present

ACHIEVEMENTS

- Solved multiple Data Structures and Algorithms problems using C++.
- Hands-on experience with AI, ML, Full Stack Development, and IoT projects.
- Built and deployed 3 full stack and 2 AI/ML projects.
